PROFILE

Cybersecurity enthusiast and aspiring smart contract auditor with a strong foundation in software development and graphic design.

Currently diving deep into blockchain security and Web3 technologies while actively building real-world projects and mentoring peers at Aptech.

Passionate about content creation, technical education, and security innovation.

EXPERIENCE

24th Concept

Customer Service Manager | Lagos, Nigeria | 2022 - 2025

- Led a customer service team to resolve client issues efficiently and professionally.
- Improved customer retention by streamlining support processes and enhancing satisfaction metrics.
- Collaborated cross-functionally with marketing and product teams to deliver user-centered services.

Prodigy InfoTech

Web Developer (Internship) | Remote | 2025

- Contributed to front-end development tasks using HTML, CSS, and JavaScript.
- Participated in collaborative development and Git version control workflows.

PROJECTS

DecorVista - Home Interior Design App

- Web app using React and HTML/CSS for interior visualization.

CurrenSee - Currency Conversion App

- Built with Flutter (frontend) and MySQL (backend)
- Integrated CurrencyLayer API for real-time exchange rates.

BrightWorld

- JavaScript-based project with dynamic, interactive features.

ERC20 Token Testing with Foundry

- Hands-on Web3 experience simulating ERC20 token behavior.
